Ground Truth: how an AI agent hires a human, and PayPal pays only on proof

Agent tool call → PayPal hold → human photo → Gemini verdict → PayPal capture + payout, or void. Hosted on Fly.io: groundtruth-agent.fly.dev

1. AI agent (MCP-style tools)

`GET /mcp/tools`
`POST /mcp/tools/hire_human`
`POST /mcp/tools/task_status`
"Is the Walgreens on this corner a 24-hour pharmacy?" + $5 bounty

2. Ground Truth server

Node.js + Express on **Fly.io**
Creates the task, holds the money, serves the worker page, runs the verdict, settles

3. PayPal Orders v2: HOLD

`POST /v2/checkout/orders` intent **AUTHORIZE**, $5.00
Agent wallet: sandbox card, authorizes instantly, no redirect
Auth `1E1717524F071214K`

↓

4. Worker phone page `/t/:id`

Human accepts the $5 job, walks to the spot, takes the photo in the browser

5. Gemini vision verdict

`gemini-3.5-flash`, strict JSON:
`{pass, reasons[], sign_text, open_status, answer}`
Reads the sign, checks the question, decides

↓ PASS

FAIL ↓

PASS: PayPal capture + PayPal Payouts

`POST /v2/payments/authorizations/{id}/capture`
Capture `0DL4887586075903H` COMPLETED $5.00
`POST /v1/payments/payouts` to the worker
Batch `JA59SN6BUCE46`, item `MUCJL6UXDS736` SUCCESS
Sign read: "Walgreens 24-HR PHARMACY"

FAIL: PayPal void, $0 moved

`POST /v2/payments/authorizations/{id}/void`
Auth `0WN72180YD1254017` VOIDED
Sign read: "REAL BRAVE MUSIC" (the Rite Aid is gone)
No capture, no payout, agent's money released

Every status is read back from PayPal GET endpoints

Orders v2 · Authorizations (capture / void) · Payouts · all in PayPal sandbox, ids recorded in PROOFS.md · Code: github.com/kamalbuilds/ground-truth
